

# PETALS INFOTECH PRIVATE LIMITED

Where innovation meets imagination

# About Us

We are the automation expert in the industries, utilizing the new technology in a variety of situations to help clients vastly improve manufacturing efficiencies. We evaluate, design and implement a cost-effective automation solution tailored to your business.

Petals Infotech Private Limited is an IT Solutions & Services organization that has implemented 100+ projects in diverse industries such as Cement, Steel, Sugar, Chemical, Paper, Wood, FMCG, Mines, Metal recycling and small industries across multiple geographies in the world. Over a span of 6 year.

The pioneering efforts of the team in inculcating a culture of excellence and creativity in the organization have led to technology-based innovations with a transformational impact on the way of doing business. Petals Infotech continues to break thought barriers and progress, onwards and upwards.

# Our Solutions

- CANE MANAGEMENT SYSTEM
- METAL RECYCLING MANAGEMENT SYSTEM
- FIELD AREA SURVEY MANAGEMENT SYSTEM
- VISITOR MANAGEMENT SYSTEM
- WEIGHBRIDGE AUTOMATION
- CUSTOMIZED APPLICATION DEVELOPMENT

## Industries We Serve

- Cement
- FMCG
- Chemical
- Paper
- Wood
- Ports
- Metals
- Mines
- Sugar
- Steel
- Ceramic

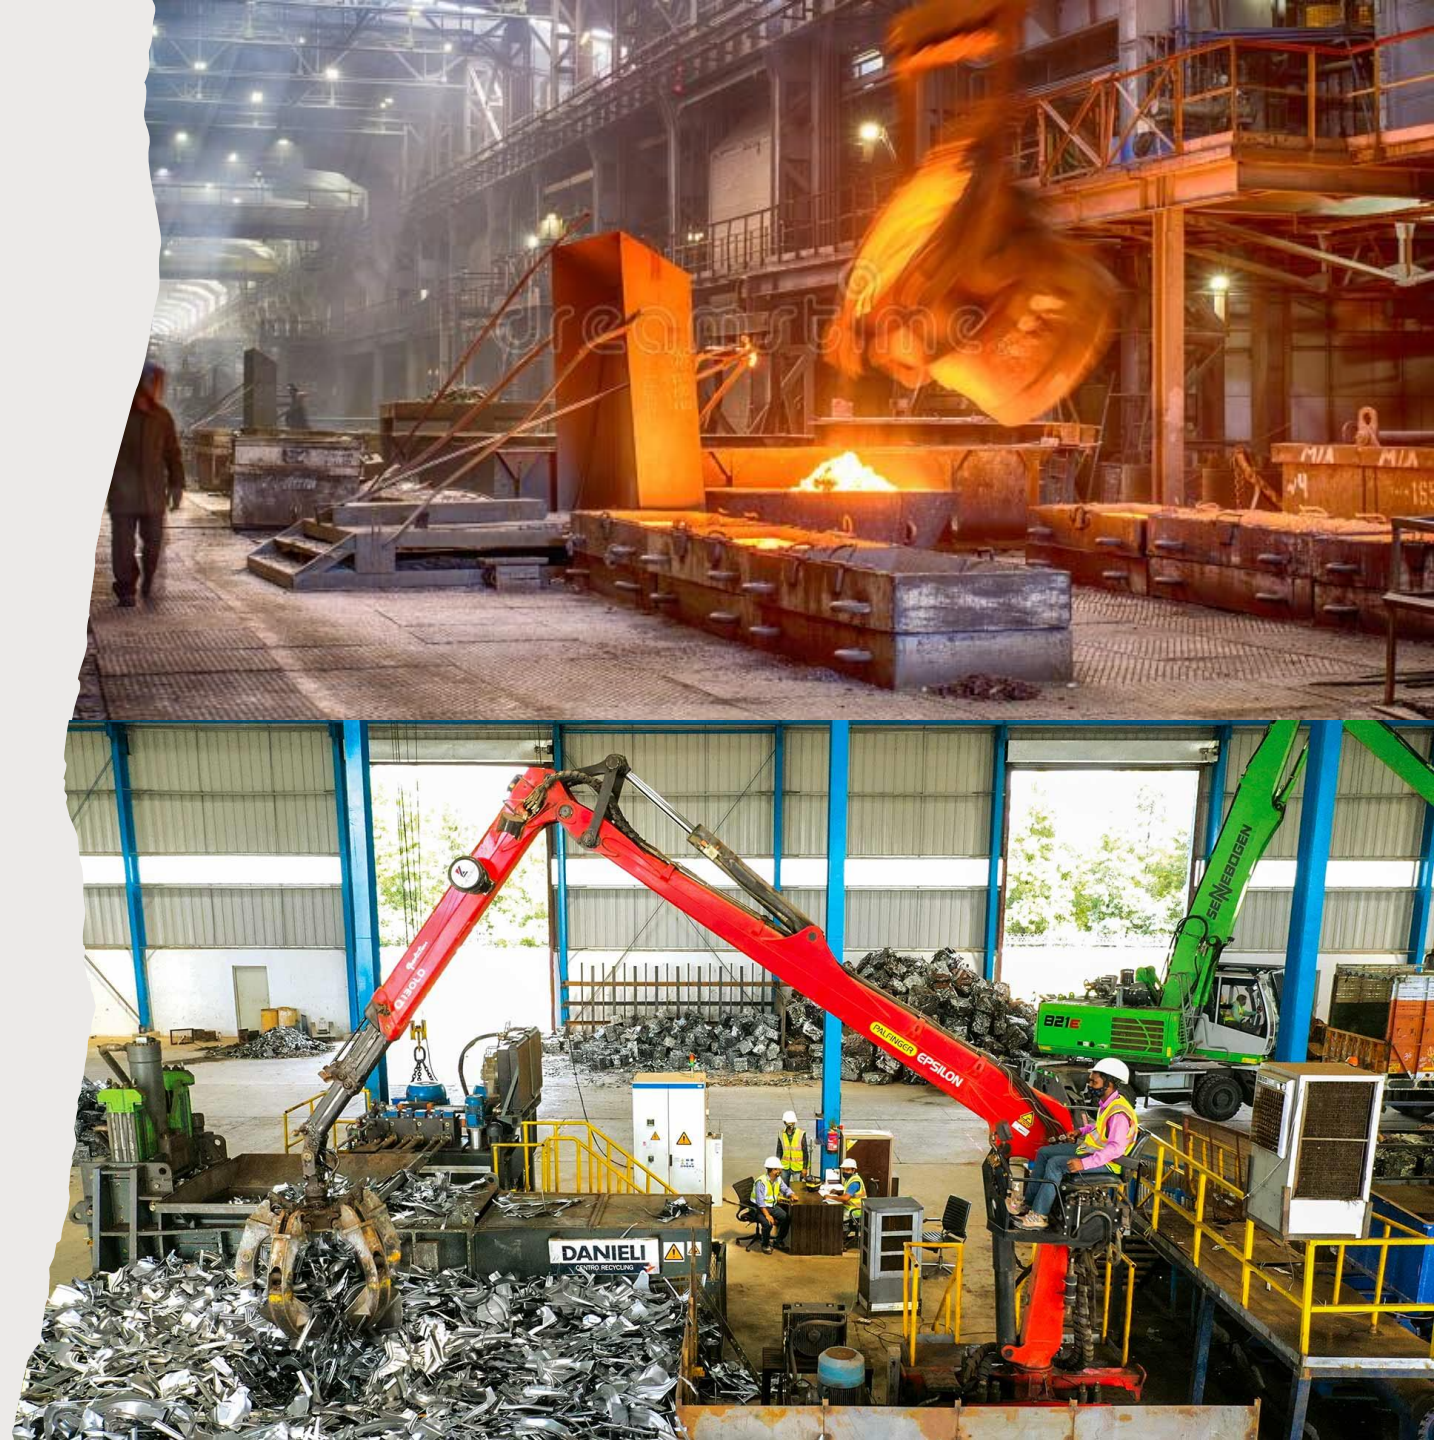

# Cane Management System

Our Cane Management System enables sugar factory to efficiently plan, manage and forecast their business operations in an increasingly dynamic and competitive marketplace. Since a sugar factory totally relies on timely and quality sugarcane supply, therefore monitoring of sugarcane from the fields up to the factory till it gives “Sugar” is the focused area in sugar factory. CMS allows, keeping track the amount of cane that is being cultivated for factory, keeping track of transportation required including GPS Tracking, harvesting labor required, advance payments, smart weighbridge management, MIS and bills.

# Metals Recycling Management System

Managing a commercial recycling enterprise has become increasingly complex and competitive in the global economy. Compliance, inventory management, pricing, grading – each aspect of your business hinges on another. This complexity can breed inefficiency and dealing with outdated IT legacy systems and paper processes doesn't make it any easier.

# GPS Farmer Survey System

GPS Farmer Survey System is a Field Area measuring app that calculates the area of a field or any other space. It is a great tool for farmers, gardeners, range finders, constructors, engineers, and many others. The app is practical for outdoor activities, such as biking, hiking, and running. It is convenient for people who are spraying, fertilizing, seeding, harvesting farms or tilling.

Farm managers and contractors who are farming for others can use the app to measure land, utilize a fast area and distance marking, mark boundaries and territories, and share them with the owner. The fields are displayed in Google Maps

# Visitor Management System

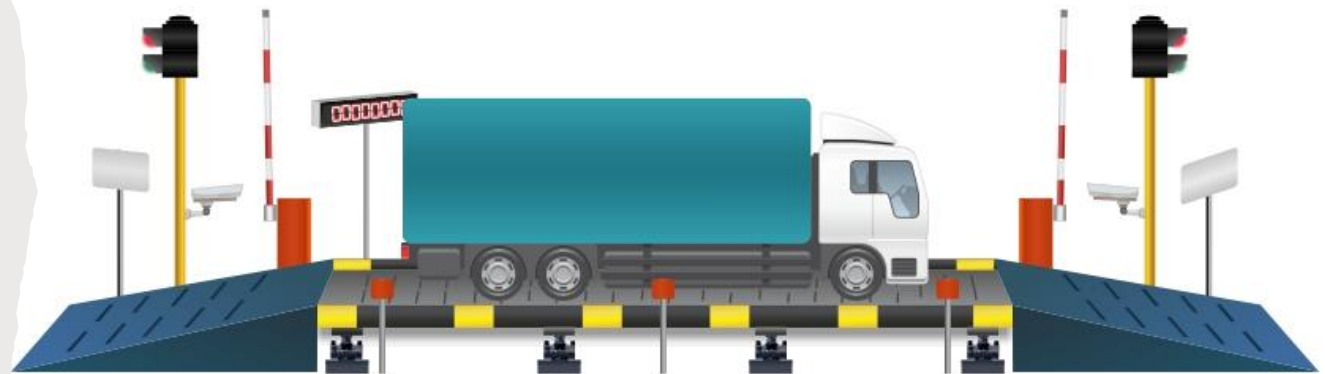

Our Visitor Management System offers a convenient pre-registration page on the employee self-service platform, empowering hosts to enter visitor details in advance. This includes important information such as the visitor's name, organization, purpose of visit, date, and time. With this advanced feature, hosts can effortlessly generate visitor passes prior to their arrival, eliminating unnecessary hassle and saving valuable time.

Our Visitor Management ensures the utmost security and safety of our physical, intellectual, and human assets. With the ability to selectively restrict or grant access, this comprehensive solution allows us to effectively control visitor movements within our premises.

# Weighbridge Automation

**Weighbridge Automation** is an automation solution for weighbridges which removes the need for a full-time operator to supervise weighing of trucks. In order to do so, an Unmanned Weighbridge System incorporates peripheral devices to perform different activities of the operator along with an intelligent control system.

# CUSTOMIZED APPLICATION DEVELOPMENT

Petals has been one of the pioneering organizations to custom-build solutions for customers for automation of their business processes. However, the enhancement has been in the form of reduction in the time-to-market for better for our customers. By the introduction of open standards, agile methodology and third-party tools, we ensure complete solutions as quickly as our customers can perceive a requirement.
